

# Alameda Reuse Diversion Facility

**Client**

Albuquerque

**Completion**

2004

**Size**

2,400 Square Feet

**Cost**

\$570,000

The award-winning North I-25 Reclamation/Reuse System Nonpotable Surface Water Reclamation Project was designed by Molzen Corbin to architecturally blend into the natural environment. The result is a structure that incorporates curves and textures that blend into the native environment and express the concept of water. The colors and materials were selected to compliment the colors of the Bosque in all seasons.

**Scope of Work**

Architecture
