

Anthony Well No. 1 and No. 4

Client
AWSD

Completion
2013

Size
600 GPM

Cost
\$624,892

Wells No. 1 and No. 4 were re-drilled as part of the District's Arsenic and Nitrate removal project, and are configured to enable treatment by reverse osmosis at a centralized site. Wells No. 1 and No. 4 are both equipped with 600-gpm pumps, with Well No. 1 designed for an ultimate capacity of 1,100 gpm. These wells work in conjunction with Well No. 3 and Well No. 6, which are also equipped with 600-gpm pumps. All four wells are configured to flow to a reverse osmosis treatment plant at the Well No. 4 site. A water tank and pump were also installed at the Well No. 4 site to improve system pressure.

Scope of Work

Water, Grants/Funding, Construction Observation/Administration
