

Los Morros Drainage

Client

Los Lunas

Completion

2019

SizeTwo Dams
(Over 50 Acre-Feet Each)**Cost**

\$1.1 million

Molzen Corbin acted as the Engineer Supervising Construction for this \$1.1-million flood control project, which was designed to protect the Village of Los Lunas against flows from a nearby arroyo. Project elements included two dams of over 50 acre-feet each, berms, and drainage channelization. The project also included soil-cement spillways, drop structures, and several training dykes, each more than one mile long to direct flows into the dams.

Scope of Work

Drainage Engineering
