

# Moriarty Crosswind Runway 18-36

**Client**

Moriarty

**Completion**

2012

**Size**

6,200 x 75 Feet

**Cost**

\$2,048,100

Molzen Corbin planned, designed and performed construction administration services for the construction of the new crosswind runway at Moriarty Municipal Airport. The project actually was conceived in 1998 in the Airport Action Plan. Molzen Corbin assisted in coordinating the environmental assessment mitigation, the land acquisition and all of the grants administration in this project. This is the first “new” runway constructed in New Mexico in many years and was constructed as a safety improvement providing a second runway bringing the wind coverage at Moriarty above the FAA recommendations.

**Scope of Work**

Airport Engineering, Grants/Funding
